

Fundamentals of ecotoxicology, 2009, 541 pages, Michael C. Newman, 1420067044, 9781420067040, CRC Press, 2009

"Fully revised to reflect new developments, the new edition of this renowned text details key environmental contaminants, explores their fate and cycling in the biosphere, and discusses bioaccumulation and the effects of contaminants at increasing levels of ecological organization. It also covers regulatory aspects of the field and discusses key U.S., European, and Chinese legislation and policy. It provides new study questions, a detailed glossary, and new international case studies by leading world-known experts."--Publisher's description.
